Expectations

Key Aways

- What is the knowledge that is required to implement own use cases ?
- What are the teachings that will be shared ?
- Why AI Orchestration is needed?
- Why Embedding & Vector stores are needed ?

Rules of engagement

- If you have any questions or need help, please raise your hand.
- Our coaches are here to help you, not to tell you what you have to do.
- Please try to stay on schedule. If you have any questions or would like to discuss something, please do so during the breaks.

Conduction

Hackathon activities:

- Review the team assignment
- Planning the assignment execution
 - The big teams should have 2 “leaders”
 - The small teams should have 1 “leader”
- Validate your set-up
 - Validate the configuration initialization
- Starting the development
